Reliable marine expertise. Connected solutions.

Marine equipment • Satellite connectivity • Marine supply

JC MARINE INTEGRATION

JC CONNEXION

JC SUPPLY

One group. Three areas of expertise.

01

Marine Integration

Navigation, communication and automation equipment.

Inspection, repair, maintenance and installation.

02

Connexion

Satellite equipment, airtime subscriptions and leasing.

Vessel tracking, IT and network solutions.

03

Supply

Marine products and safety equipment.

Calibration, fire alarms, fabrication and technical documentation.

Professional. Practical. Proactive.

"To excel as the most diversified, progressive and well-respected marine services provider within South East Asia."

DELIVER

Complete work within customers' timelines with qualified technicians and field engineers.

COMMIT

Meet customer requirements and uphold service quality and satisfaction.

SUPPORT

Build a motivated workplace that supports long-term partnerships and quality of life.

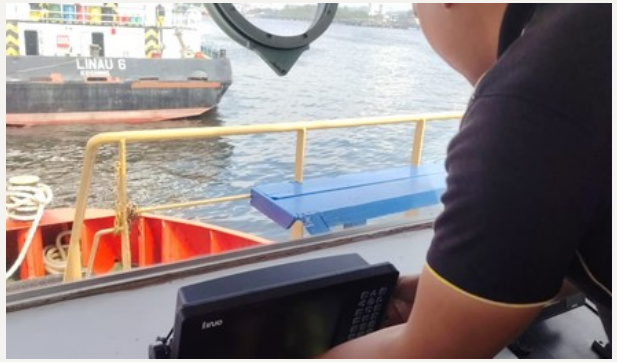

Marine expertise since 1999

Integrated solutions for the shipping industry

JC Marine specialises in marine communication and navigation equipment, together with automation systems.

Our services cover inspection, troubleshooting, repair, maintenance and programming, plus the sale and installation of new and replacement equipment.

Trusted brands. Proven equipment.

AUTHORISED DISTRIBUTOR

JRC & Alphatron Marine

JC Marine Integration Sdn Bhd

AUTHORISED DEALER

Iridium LT-3100

Marine satellite communication equipment

Service reach across South East Asia

Beyond Malaysia

An extensive service partner network supports customers at their required seaports.

Across time zones

Service coordination across South East Asia time zones.

Where customers need us

Technicians and field engineers travel according to clients' requirements.

Complete support for marine systems

- Navigation & communication systems
- Shore-based maintenance
- VDR & SVDR annual performance tests
- Gyrocompass calibration
- Magnetic compass adjustment

INSTALL / INSPECT / TROUBLESHOOT / REPAIR / MAINTAIN

Compliance & annual performance

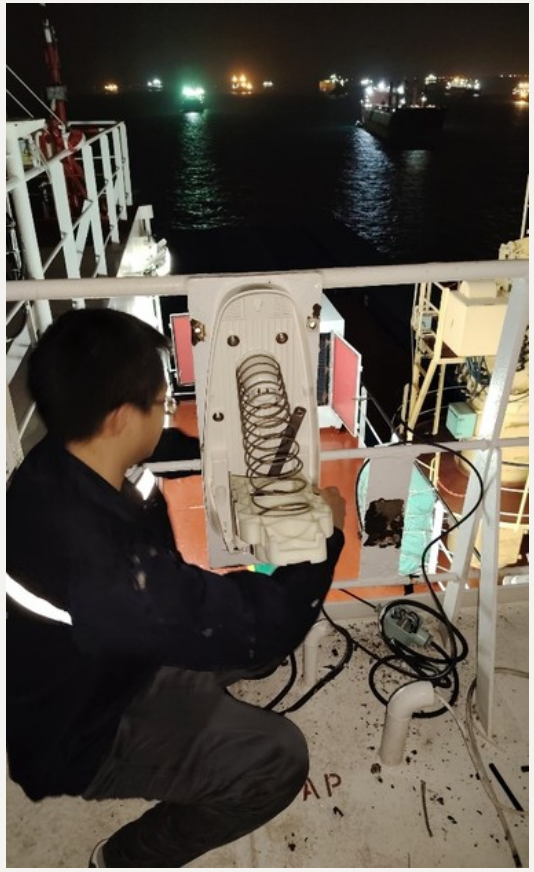

Shore-based maintenance

Support for Shore-Based Maintenance Agreements mandated by flag authorities to validate the functionality of vessels' GMDSS communication systems.

VDR & SVDR performance tests

Qualified and recognised field engineers and technicians conduct Annual Performance Tests for Voyage Data Recorders and Simplified Voyage Data Recorders.

Precision for vessel navigation

Gyrocompass calibration

Qualified technicians calibrate gyrocompasses across various brands.

Magnetic compass adjustment

Qualified field engineers adjust magnetic compasses across various brands.

Keeping maritime operations connected

100+

VSAT & Starlink units supplied and installed

Established in 2023, JC Connexion is a sister company of JC Marine Integration, providing satellite airtime services for maritime and offshore vessels.

Connectivity from equipment to airtime

01

Internet airtime

L-band, FleetBroadband and Fleet One.

02

VSAT & Starlink

Equipment installation and airtime services.

03

Equipment leasing

Satellite hardware bundled with internet airtime.

04

Airtime control

Monitor, manage and restrict data usage.

05

Vessel tracking

Installation, airtime and leasing packages.

06

IT & networks

Custom systems, servers and network configuration.

Flexible airtime for maritime operations

Satellite internet subscriptions

Bandwidth solutions and satellite airtime for L-band, FleetBroadband (FBB) and Fleet One systems.

Prepaid

Packages valid for one month or 30 days from activation.

POSTPAID

Pay per use at an agreed fixed price.

VSAT & Starlink installation

Installation at berth or anchorage

Installation on customer vessels within port limit areas.

Airtime services are also available for customers with satellite equipment already installed onboard.

PREPAID / POSTPAID

Satellite equipment leasing

01

Lease to Own

24–60 month agreement.

Option to buy equipment at an agreed price when the lease expires.

02

Life-time Warranty

24–60 month agreement.

Option to terminate after 24 months.

1-for-1 exchange for eligible faults or non-human-caused damage.

BOTH PACKAGES INCLUDE

VSAT or Starlink equipment • Installation & dismantling • Commissioning & setup • Monthly airtime

Control usage. Manage satellite costs.

An onboard firewall monitors and controls data usage to support efficient, cost-effective satellite communication.

- CCTV ports & ship computer email
- Website & mobile application restrictions
- PIN-based user recognition
- Voucher-based internet access

MONITOR / CONTROL / OPTIMISE

Vessel visibility & connected workplaces

Vessel tracking

Powered by POLE STAR Purplefinder for reliable, real-time vessel tracking.

- Tracking system installation
- Airtime subscriptions
- Equipment leasing & airtime bundles

IT & network systems

Custom software, IT and network solutions tailored to offices and workplaces.

Server installation, maintenance & monitoring

Network configuration

Marine supplies. Technical capability.

Established in 2023

A sister company of JC Marine Integration, expanding the group’s services into marine supplies.

High-quality products and services that support long-lasting customer relationships.

SUPPLY / SAFETY / ENGINEERING

Equipped for everyday marine operations

- Provisions & marine hardware
- Shackles & wire ropes
- Polypropylene ropes
- Marine type-approved valves
- Lifesaving & firefighting equipment
- Lubricating oil & grease
- Coveralls & safety shoes / boots

Calibration, repair & fabrication

Calibration & overhaul

Qualified service engineers provide repair, maintenance and overhaul services, including gas detector supply and calibration.

Hot works & fabrication

Experienced personnel carry out repair and fabrication work, including steel welding and aluminium welding.

Marine fire alarm systems

From installation to annual inspection

Qualified and experienced field engineers service various brands of marine fire alarm systems.

- Installation, repair & troubleshooting
- Annual inspections
- Panels, fire & smoke detector sensors
- Portable fire & smoke detector testers

Clear documentation. Precise illustration.

01

Technical writing

Ship operating and engineering manuals.

Maintenance plans for engines, gearboxes, control stands and deck equipment.

Review, update and convert existing files.

02

Illustration & electrical design

Supporting graphics and custom technical drawings.

Electrical drawings and calculations for vessels converting from domestic operations to near-coastal service.

Let’s support your next voyage.
