JC GROUP

Our group

Three specialist businesses support marine equipment, vessel connectivity and marine supply requirements.

JC MARINE INTEGRATION SDN BHD

202301042692 (1536608-W)

Marine navigation, communication and automation equipment; inspection, repair, maintenance and installation.

JC CONNEXION SDN BHD

202301044444 (1538360-W)

Satellite airtime, equipment leasing, vessel tracking, IT and network solutions.

JC SUPPY SDN BHD

202301050114 (1544028-W)

Marine supplies, safety systems, fabrication and technical documentation.

Our purpose

OUR VISION

To excel as a diversified, progressive and well-respected marine services provider in South East Asia.

Deliver

Complete work within customers' timelines with competent, qualified technicians and field engineers.

Commit

Meet customer requirements and uphold satisfaction within the agreed timeframe.

Support

Build a motivated workplace that supports long-term partnerships and quality of life.

PROFESSIONAL. PRACTICAL. PROACTIVE.

JC Marine Integration

Marine expertise since 1999.

Integrated solutions for the shipping industry, specialising in marine communication and navigation equipment, together with automation systems.

Regional service reach

Our service partner network extends support beyond Malaysia to clients' required seaports. Teams coordinate across South East Asia time zones, with technicians and service engineers travelling according to customer requirements.

Equipment services

Navigation, communication and automation equipment.

Core service cycle

Inspection · Troubleshooting · Repair
Maintenance · Programming

Equipment supported

Navigation	Chart plotters · ECDIS · Speed log
Steering & heading	Steering gear (electronics & electricity) · Autopilot · Gyrocompass · Rudder angle indicator
Other instruments	Aldis light · Wind speed & direction

Sales & installation

New equipment for new-build vessels, and replacement equipment for existing vessels.

Brand partnerships

AUTHORISED DISTRIBUTOR

JRC & Alphatron Marine

AUTHORISED DEALER

Iridium LT-3100

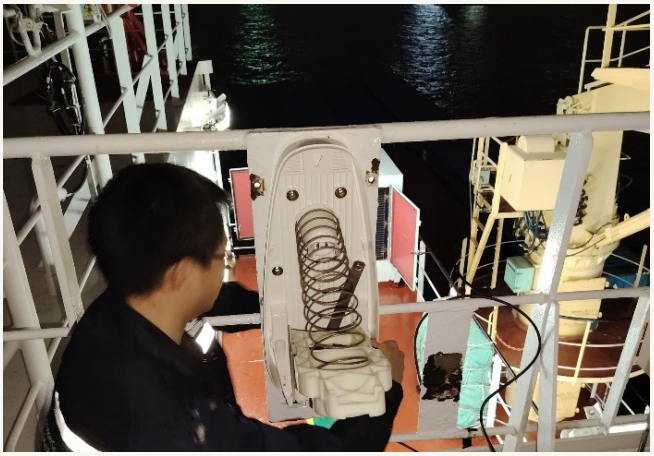

Maintenance & performance testing

Shore-based maintenance

JC Marine Integration is authorised to facilitate Shore-Based Maintenance Agreements required by flag authorities to validate vessel GMDSS communication systems.

VDR & SVDR annual performance tests

Qualified and recognised field engineers and technicians conduct Annual Performance Tests for Voyage Data Recorders and Simplified Voyage Data Recorders.

Compass services

Gyrocompass calibration

Qualified technicians calibrate gyrocompasses across various brands.

Magnetic compass adjustment

Qualified field engineers adjust magnetic compasses across various brands.

JC Connexion

Established in 2023, JC Connexion is a sister company of JC Marine Integration, providing satellite airtime services for maritime and offshore vessels.

100+

VSAT & Starlink systems supplied and installed

Together with airtime subscription services.

Source: supplied company profile, 28 October 2025.

Satellite airtime

Bandwidth and satellite airtime solutions for maritime communication systems.

Supported services

L-band
FleetBroadband (FBB)
Fleet One

Prepaid

Packages valid for one month or 30 days from activation.

Postpaid

Pay per use at an agreed fixed price.

Prepaid and postpaid options are also available for VSAT and Starlink airtime.

VSAT & Starlink

Vessel installation

Installation on customer vessels at berth or at anchorage within port limit areas.

Airtime support

Airtime is also available to customers who have already purchased and installed their own satellite equipment onboard.

Satellite equipment leasing

VSAT or Starlink equipment bundled with internet airtime.

BOTH AGREEMENTS: 24–60 MONTHS

Lease to Own

Option to purchase the equipment at an agreed price after the lease expires.

Life-time Warranty

Eligible to terminate after 24 months.

1-for-1 exchange for equipment faults or non-human-caused damage.

MONTHLY PACKAGES INCLUDE

Satellite equipment · Monthly airtime
Mobilisation & demobilisation (installation & dismantling)
Equipment commissioning & setup

Airtime control

An onboard firewall monitors and controls data usage for efficient, cost-effective satellite communication.

Manage access and usage

CCTV ports

Email from ship computers and laptops

Restricted websites

PIN-based user recognition

Mobile application restrictions

Voucher-based internet access

Vessel tracking

Reliable, real-time ship tracking powered by POLE STAR Purplefinder.

Installation

Vessel tracking system installation.

Subscription

Tracking-system airtime subscriptions.

Bundle

Equipment leasing with airtime subscription.

IT & networks

Custom software, IT and network systems developed and implemented for each customer’s offices and workplaces.

Server support

Installation, maintenance and monitoring.

Network configuration

Network configuration services tailored to customer needs.

JC Supply

Established in 2023, JC Supply is a sister company of JC Marine Integration, extending the group into marine supplies.

Products. Services. Relationships.

We aim to deliver high-quality products and services and build long-lasting customer relationships.

MARINE SUPPLIES / SAFETY / TECHNICAL SUPPORT

Marine supplies

Deck & hardware

Marine hardware; shackles; wire ropes; polypropylene ropes; marine type-approved valves.

Safety & protection

Lifesaving equipment; firefighting equipment; coveralls; safety shoes and boots.

Provisions & consumables

Provisions; lubricating oil and grease.

Calibration & fabrication

Calibration & overhaul

Qualified service engineers provide repair, maintenance and overhaul support.

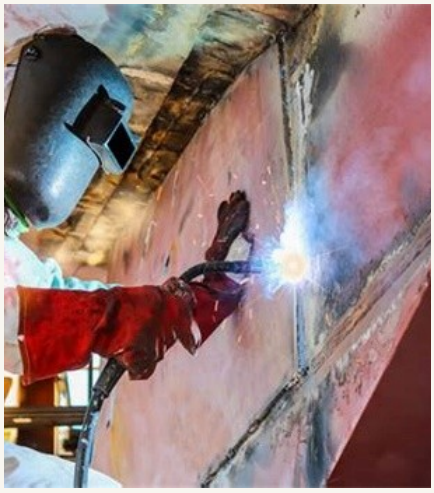

Gas detector supply and calibration services are available.

Hot works & fabrication

Experienced personnel carry out repair and fabrication work.

Steel welding
Aluminium welding

Marine fire alarm systems

Qualified and experienced field engineers support various brands of marine-type fire alarm systems.

Service

Installation · Repair · Troubleshooting
Annual inspections

Supply

Fire alarm panels; fire and smoke detector sensors; portable fire and smoke detector testers.

Technical writing & illustration

Technical writing

Clear documentation for vessel operations and equipment.

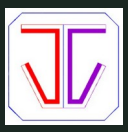

- Ship operating and engineering manuals
- Maintenance plans for engines, gearboxes, control stands and deck equipment
- Review, reuse, update and convert existing files

Illustration & electrical design

Supporting technical graphics and new drawings prepared to customer requirements.

Experience includes electrical drawings and electrical calculations for vessels converting from domestic to near-coastal operations.
